Home Page

Quick Test Professional

Load Runner

QTP is one of the most popular often automated test tools. We have used Rational Robot and Compuwares QA Run and evaluated these to best suit the needs of our many clients. STS have developed [Automated test Frameworks](#) to work with QTP which in our opinion is the way all automated test tools should be used. Check out their page.

LR is one of the most capable systems loading tools on the market. Its got a lot of quirks but careful preparation can prove its worth albeit at a cost.

Email us at: S T S # 3 4 u 2 c . c o m for any assistance our Loading labs can provide for you.

Quality Centre

Simple user interface and customisable with Very complex capabilities if required. This product can be used to control and coordinate both QTP and LR but has unexpected limitations.

OUR IDENTITY

To provide best advice based on our insights and your current needs.

Charitable Work

Our aims are to support Christian Evangelistic Missionary work including the support of widows and orphans in affliction.

Our Principles

- 1. We work for you as if for Our Lord and King.
- 2. We expect to treat you as we expect to be treated.
- 3. We expect full cooperation and support in our work for you by all your staff and any other parties.
